

KHC

PRESSURE TRANSMITTER WITH DIGITAL OUTPUT CANopen® and J1939

KHC pressure transmitters are based on film sensing element deposited on stainless steel diaphragm.

Thanks to the latest state of the art SMD electronics and compact all stainless steel construction, this products are extremely robust and reliable, specially suitable for mobile hydraulics applications.

In particular the KHC series combines high accuracy with temperature stability, resistance to extreme environmental conditions and digital outputs with mobile hydraulics typical protocols. The model KHC is available with either CANopen® or J1939 protocol.

Developed to ensure a robust and high-performance solution for applications such as agricultural machines, contruction machines and material handling equipments.

The digital signal, in addition to the pressure measurement, also contains the data related to the temperature of the device.

The instrument is delivered preconfigured and ready to be used without any further effort. Custom configurations are also possible, to be specified on order, or

TECHNICAL DATA

Pressure ranges (2)

from 4 to 1000 bar (see table)

Power supply

8 ... 32 Vdc

Signal output

Digital CANopen® DS404 profile Digital J1939

Non-Linearity (BFSL)

± 0.15% FS (typical) ± 0.25% FS (max)

Hysteresis

+ 0.1% FS (typical) + 0.15% FS (max)

Repeatability

± 0.025% FS (typical) ± 0.05% FS (max)

Zero & Span setting tolerance

± 0.15% FS (typical) ± 0.25% FS (max)

Accuracy at room temperature (1)

<± 0.5% FS

Overvoltage protection

40 Vdc max

Wetted parts

Stainless steel Inox AISI 430F (1.4104) and 17-4 PH (1.4542)

Housing

Stainless steel Inox AISI 304 (1.4301)

Insulation voltage

500 Vdc

Long term stability

<± 0.2% FS/per year

Operating temperature range

-40 ... +125°C (process and storage) -40 ... +105°C (ambient)

Compensated temperature range

-20 ... +85°C

Temperature effects over compensated range (zero)

 \pm 0.01%FS/°C typical (\pm 0.02%FS/°C max)

Temperature effects over compensated range (span)

± 0.01%FS/°C typical (± 0.02%FS/°C max)

Measuring rate

1 msec (1000 Hz) typical

Warm-up time (3)

<30 sec

Weight

150 gr

Mechanical Shock

100g/11 ms according to IEC 60068-2-27

Vibrations

20g at 10 Hz ... 2000 Hz according to IEC 60068-2-6

Ingress protection

IP67/IP69K with appropriate mating connector plugged in

Output short circuit and reverse polarity protection

Yes

EC Conformity

According to Directive 2014/30/EU

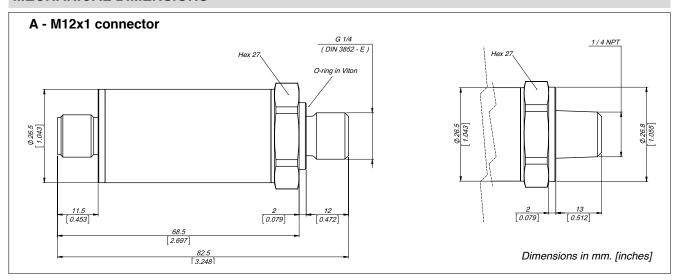

programmable by the user.

- Incl. Non-Linearity, Hysteresis, Repeatability, Zero-offset and Span-offset tolerance (acc. to IEC 61298-2)
- 2) The operating pressure range is intended from 0.5 to
- 3) Time within which the rated performance ia achieved

PRESSURE PEAKS PROTECTION

Many industrial applications, especially in hydraulics, could present dangerous phenomena like cavitation, liquid hammer or pressure peaks, due for example to pumps start and stop or fast closing of a valve.

These phenomena can be harmful to the transducer.

The KHC series, upon request, is available with an integrated pressure snubber which, thanks to a 0.5 mm diameter through hole, eliminates these harmful peaks, to protect the transducer.

Contact Gefran to request the version with pressure snubber.

ACCESSORIES ON REQUEST

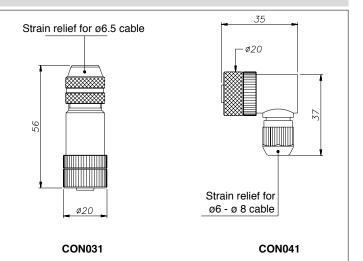

Connection A

5 pin connector M12x1 - straight

Prot. IP67 CON 031

5 pin connector M12x1 - 90°

Prot. IP67 CON 041

EXTENSION CABLES

Extension cable with female connector, 5 pin M12x1, protection IP67

CALIBRATION STANDARDS

Instruments manufactured by Gefran are calibrated against precision pressure calibration equipment wich is traceable to International Standards.

Description example: KHC-C-E-A-B04C-M-3-7 213-I-001-0-1-00

Sensors are manufactured in compliance with: - EMC 2014/30/EU Compatibility Directive

- RoHS 2011/65/EU Directive

- 2006/42/EC Machinery Directive

User manual, Electrical installation requirements and Conformity certificate are available on our website: www.gefran.com
